# The Quizzer
## Vue assignment

# Your assignment.

Create a single page app where you can take and make a quiz.

**Before you start** your project, you should return a rough sketch of how you believe the project is split up in components and routes. Followed by a Figma mockup of the project.

**As a user of your app you should be able to.**

Enter his name.

Select a quiz

Complete a quiz

Get results on how you did on the quiz

Create a quiz

Edit a quiz

You should implement this project using VueX to store the state and vue-router to add navigation to the app. The app should be responsive and work on desktop and mobile screens

**Extra credits.**

Time how long the user is answering a question\quiz

Quiz groups/categories

Create a statistic on how users do on tests

Different/custom results text on how user did on each quiz

ATT. the look of the app is up to you, this is only a visual representation of the assignment.
